PURPOSE

To establish the recordkeeping process for work-related fatalities, injuries and illnesses by requiring immediate reporting and treatment followed with worker compensation claims if needed and ensuring the quality of written documentation. This will help develop an accurate understanding of the primary and secondary causes of an accident with injury and/or illness and the corrective measures needed.

SCOPE

This procedure applies to all operations within Midland Engineering Co., Inc..

DEFINITIONS

Accident: An unintended occurrence that either caused or may have caused personal injury, property damage, or interference with production.

RESPONSIBILITY

Managers or supervisors will document and complete an accident or injury investigation in a written report (Accident & Injury/Illness Report) and distribute appropriately.

All employees of the company will be familiar with accident and injury/illness reporting procedures.

The company safety director will maintain a computer data base tracking all work-related fatalities, injuries, illnesses, accidents, investigations, and insurance loss runs to help in the development of trending and loss control directions.

ACCIDENT MANAGEMENT PROCEDURE

- **Report all accidents, regardless of the severity of the injury, to your manager or supervisor immediately.**
- When an accident occurs, first and foremost, check to see if the injured person needs medical attention that may be more than first aid. If immediate medical care is necessary dial 911 or the designated site phone number for emergency services.
- Once the injured person has been cared for, management or supervisory personnel must take any immediate actions necessary to prevent a similar type accident.
- In all accident and injury situations the Accident & Injury/Illness Report must be completed and signed (this includes first aid cases and near misses).
- If the Accident & Injury/Illness Report can't be completed before treatment, the paper work will be completed as soon as practical. In all other accident and injury instances the manager or supervisor must complete and sign the Accident & Injury/Illness Report.
- Midland Engineering Co., Inc. requires all injured employees to complete a post accident substance abuse test when receiving medical treatment. (Refer to the drug free workplace policy)
- Injuries on the road will be handled on a case-by-case basis. Regardless of where the individual receives treatment the supervisor or manager must complete the Accident & Injury/Illness Report.
- When the injured individual returns to work, he or she must turn in all paper work from the doctor and treatment facility to the manager or corresponding supervisor.
- The manager or supervisor must submit the Accident & Injury/Illness Report to the safety director.
- The safety director will review the Accident & Injury/Illness Form, treatment facility reports, doctor's evaluation, and any other paperwork and if applicable complete a formal accident investigation, as well as assist with the coordination of return to work if necessary.
- Based on the information gathered and reviewed by the safety director it may be applicable to complete a First Report of Injury for submittal of the claim to the insurance company.
- The safety director will determine if the injury/illness is recordable on the OSHA 300 Log. If the event is recordable it must be recorded within seven calendar days of receiving the information about the injury/illness occurring.
- This process shall take no longer than 24 hours.

SERIOUS INJURY OR DEATH

For accidents resulting in serious injury, care should be taken to make sure the injured party receives the proper help. Managers and supervisors must make arrangements to complete the Accident & Injury/Illness Form and conduct a formal accident investigation.

For accidents resulting in one or more fatalities or hospitalization of three or more employees, the local area OSHA office must be notified. This notification is made by a senior company representative and must be made within 48 hours after the occurrence of the accident. It can be made either orally (telephone) or faxed to the OSHA Area Director.

RECORDS & OSHA FORMS

All paper work resulting from a work-related fatality, injury or illness will be maintained in the corporate office and reviewed by management to conduct an accident analysis. A copy of any faxes or letters sent to OSHA shall remain on file in the office. Recordkeeping forms must be maintained for at least 5 years.

If the injury/illness is recordable on the OSHA 300 Log, it must be recorded within seven calendar days of receiving the information about the injury/illness occurring. The annual OSHA 300A Summary must be reviewed and signed by a Midland Engineering Co., Inc. official and a copy is to be posted in a place visible to employees. The annual summary must be posted no later than February 1st of the year following the year covered by the records and the posting kept in place until April 30th. The OSHA 300A Summary is not to be altered, defaced or covered by other material.

DESIGNATED PROVIDER

Midland Engineering Co., Inc. utilizes Methodist Hospitals as its designated occupational medical facility. There are several convenient locations throughout the Indianapolis metropolitan area if a medical facility is needed. Attached to this section is a map of these locations. Methodist will provide Midland Engineering Co., Inc. with all appropriate return to work & job restrictions for each injury.
